LESSON 1 ON COVERAGE

100% is not the goal

© 2026 CGI Inc.

FULLY AUTOMATED, DEEPLY HUMAN

People can now do things by *asking for it.*

© 2026 CGI Inc.

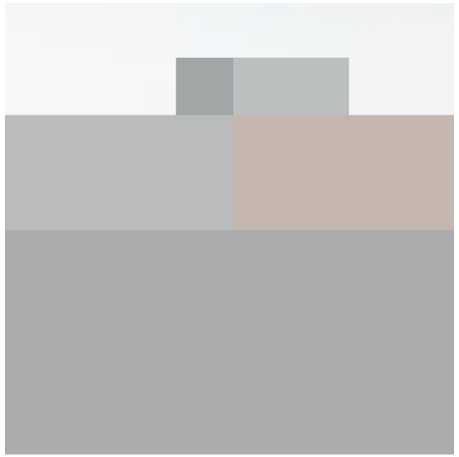

ASKING FOR IT

Use playwright-cli to operate website https://www.workroom-productions.com/raster-reveal/ and create a script that systematically reveals the image that gets more accurate by mouse movement. Take regular screenshots and figure out for each if you know what is in the picture. Keep the browser open so that I can watch it unfold.

ABOUT TESTING

Stopping criteria when automation is more accessible

0:00

Confirmed: it's a quadtree that reveals finer detail in blocks my cursor actually crosses. Let me sweep the remaining bands top-to-bottom.

0:46

A dark animal-like shape is emerging on a light background, with orange/gold accents.

3:12

That's unmistakably a black rubber duck with an orange beak and a gold Batman bat-symbol on its side/wing — a "Batman rubber duck" bath toy.

13:26

Final identification stands: a black rubber duck with an orange beak and a gold Batman logo on its side.

AI-native journey: individual experiences by role

30 experiences people grow into. Knowledge workers track 12; developers track those plus 18 more.

Knowledge worker role — 12 experiences

01	External imagination
02	Local summarizing
03	Online summarizing
04	Integrated AI features in domain tools e.g. Rovo for Confluence & Jira
05	AI-enabled practices e.g. AI notetaking
06	Task expansion
07	Personal applications
08	2nd brain
09	Token awareness
10	Generating artifacts
11	Pitch to project for AI usecase
12	Mentioned in CV

Developer role — 18 experiences

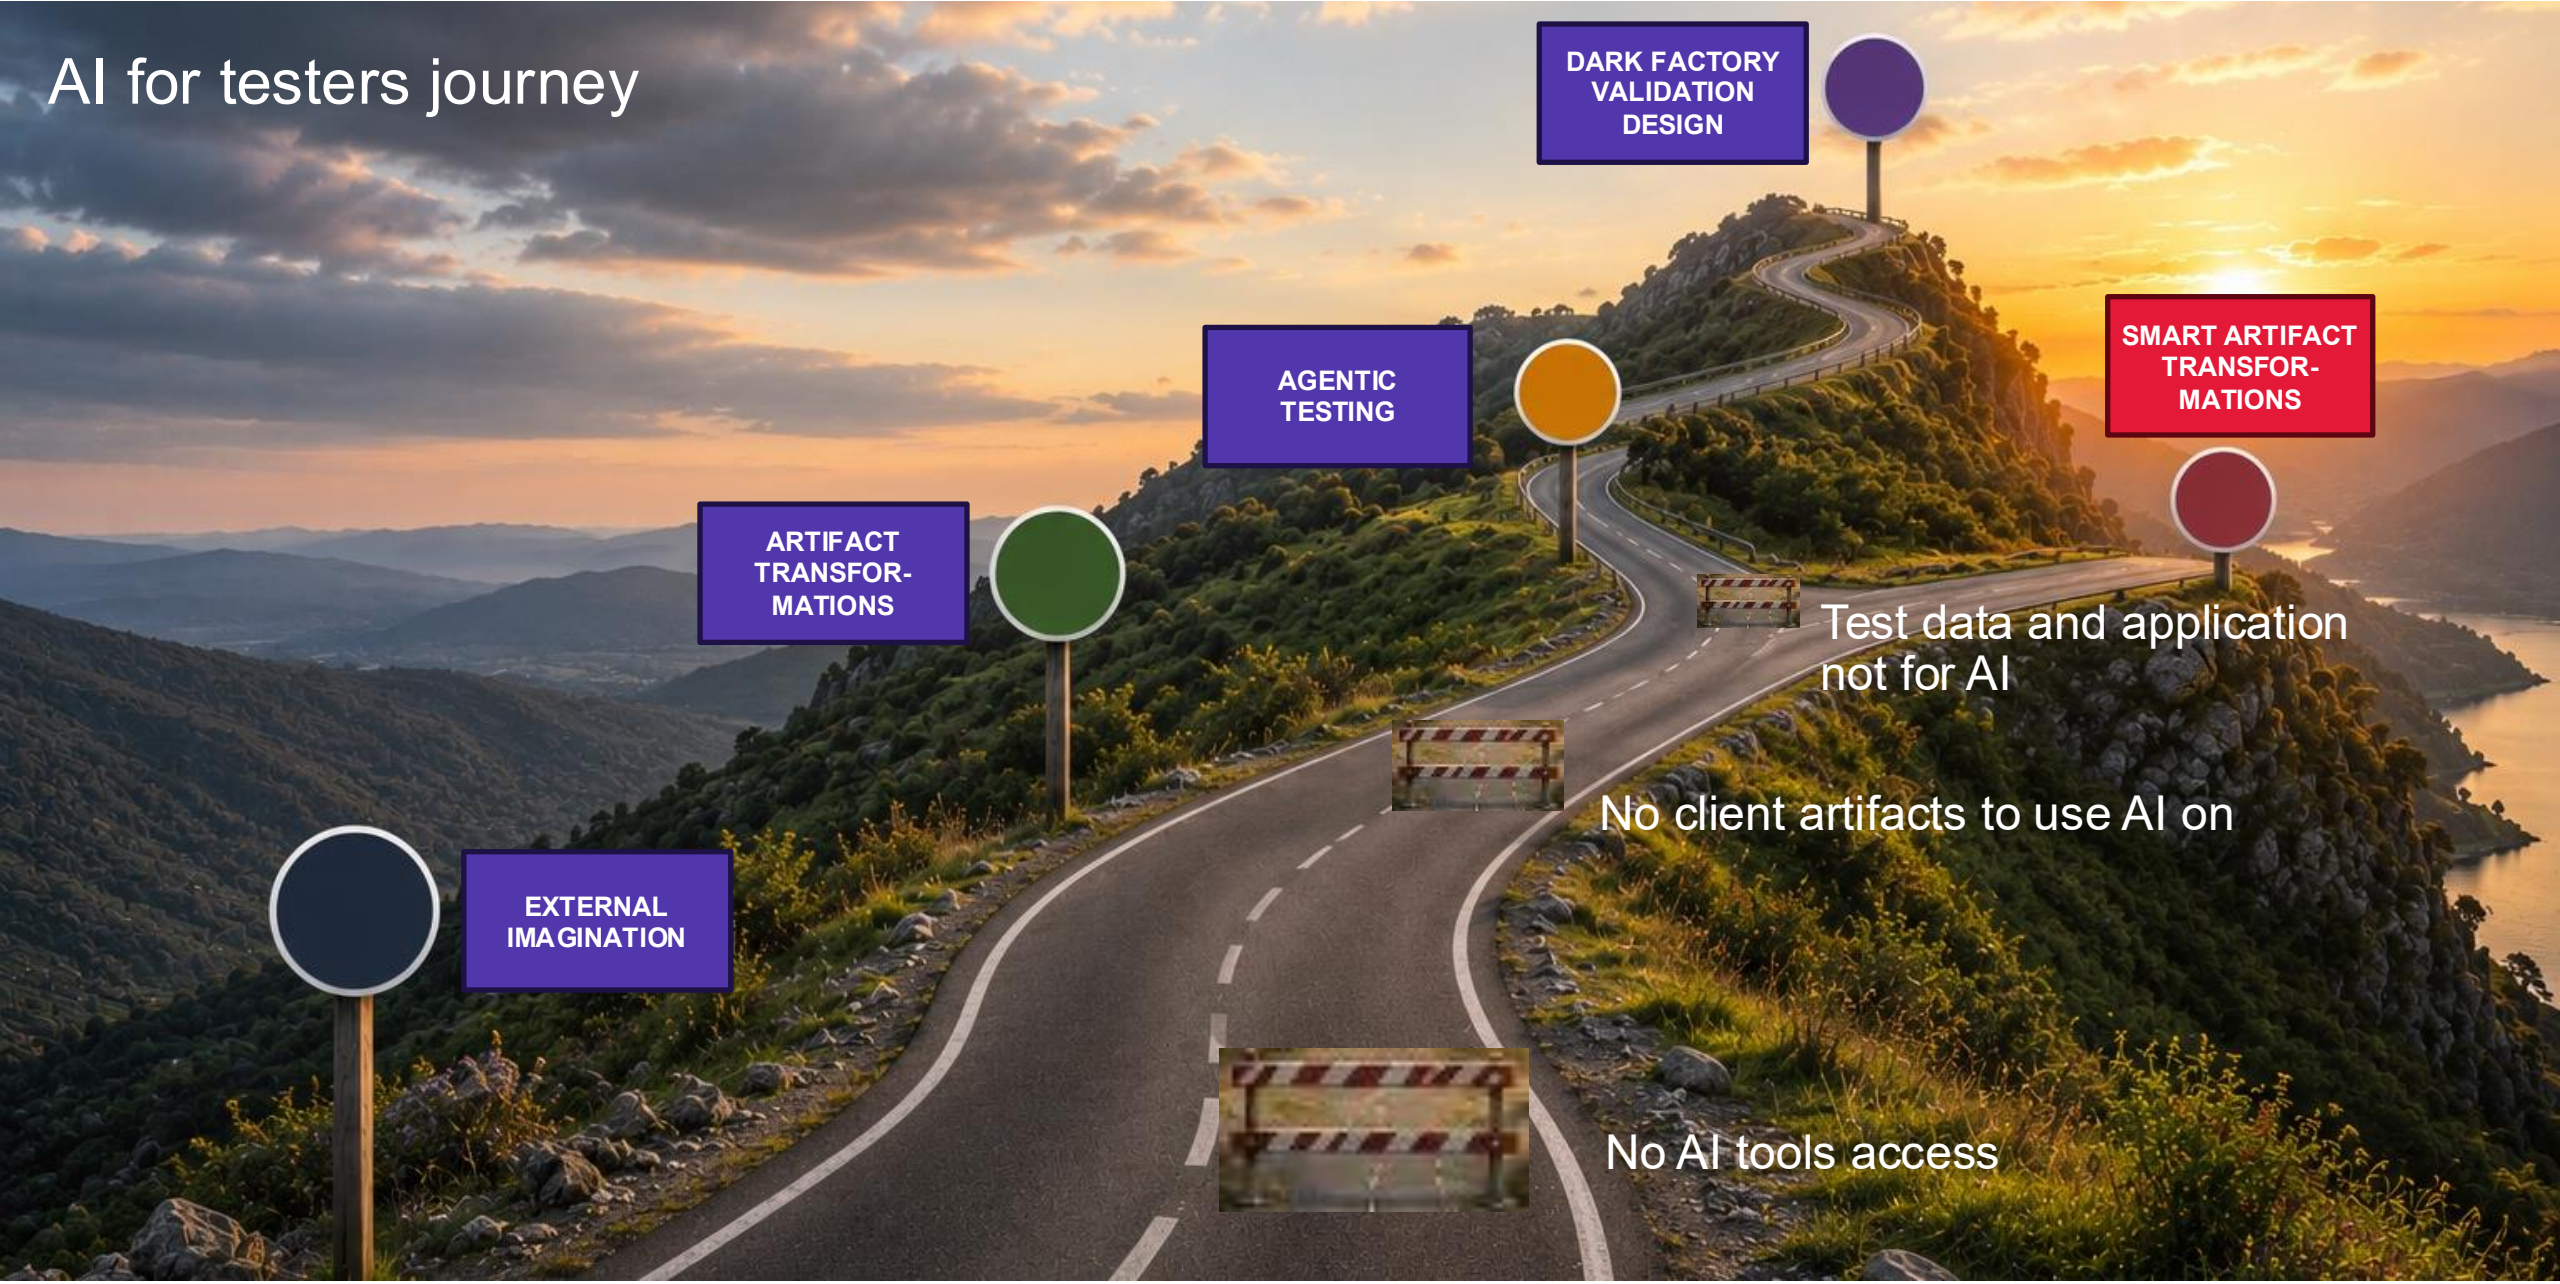

01	Code autocomplete
02	Reactive agentic you start it
03	Selecting and configuring 3rd party MCPs
04	Integrating 3rd party AI system components memory, context compression
05	Skills and AI-friendly git-first templates
06	Using local models
07	Proactive agentic it starts automatically
08	Dark factory unattended
09	Spec-driven development
10	Team/Product context e.g. .md files
11	Team/Product context advanced e.g. MCPs, memory, skills, orchestration
12	Building own MCPs
13	Delivering AI native project
14	Product AI feature delivery for proof of concept
15	Added business value in domain AI proof of concept
16	Product AI feature delivery to run in production
17	Product feature AI feedback
18	Sandboxing

An experience counts when you can tell its story: "…when AI makes it possible for you to do things you used to think as someone else's work." Task expansion

From doubtful intent to learning at the center

© 2026 CGI Inc.

NEW FRAMING FOR TEST PROCESS

Automation is documentation

1 · FIRST

Collaborate

1 Start with enablers: budget, test environment, people — the things that move slowly

2 Risk-based sampling of reviews; follow the change

3 Build up a risk register and core examples in **living common ground**

2 · RIGHT AFTER

Automate — the documentation

4 When you test, first ask for bugs: quality slices

5 Pair to fix bugs, leaving behind architecture-aware test automation: **red → green → pull request**

6 Model the APIs and UIs to increase automation coverage

7 Ensure core examples are included and reported green

3 · THEN

Explore

8 Spend time using the application; report bugs by fixing them

4 · LAST

Test cases

9 Publish the list of test cases for review and conversation — generated primarily from the automation

↻ ALL ALONG **10** Collect product risks and drive risk-based quality slices **11** Improve bug fix decision-making rules

LESSON 2 ON COVERAGE

Experiences coverage is foundation for innovation

© 2026 CGI Inc.

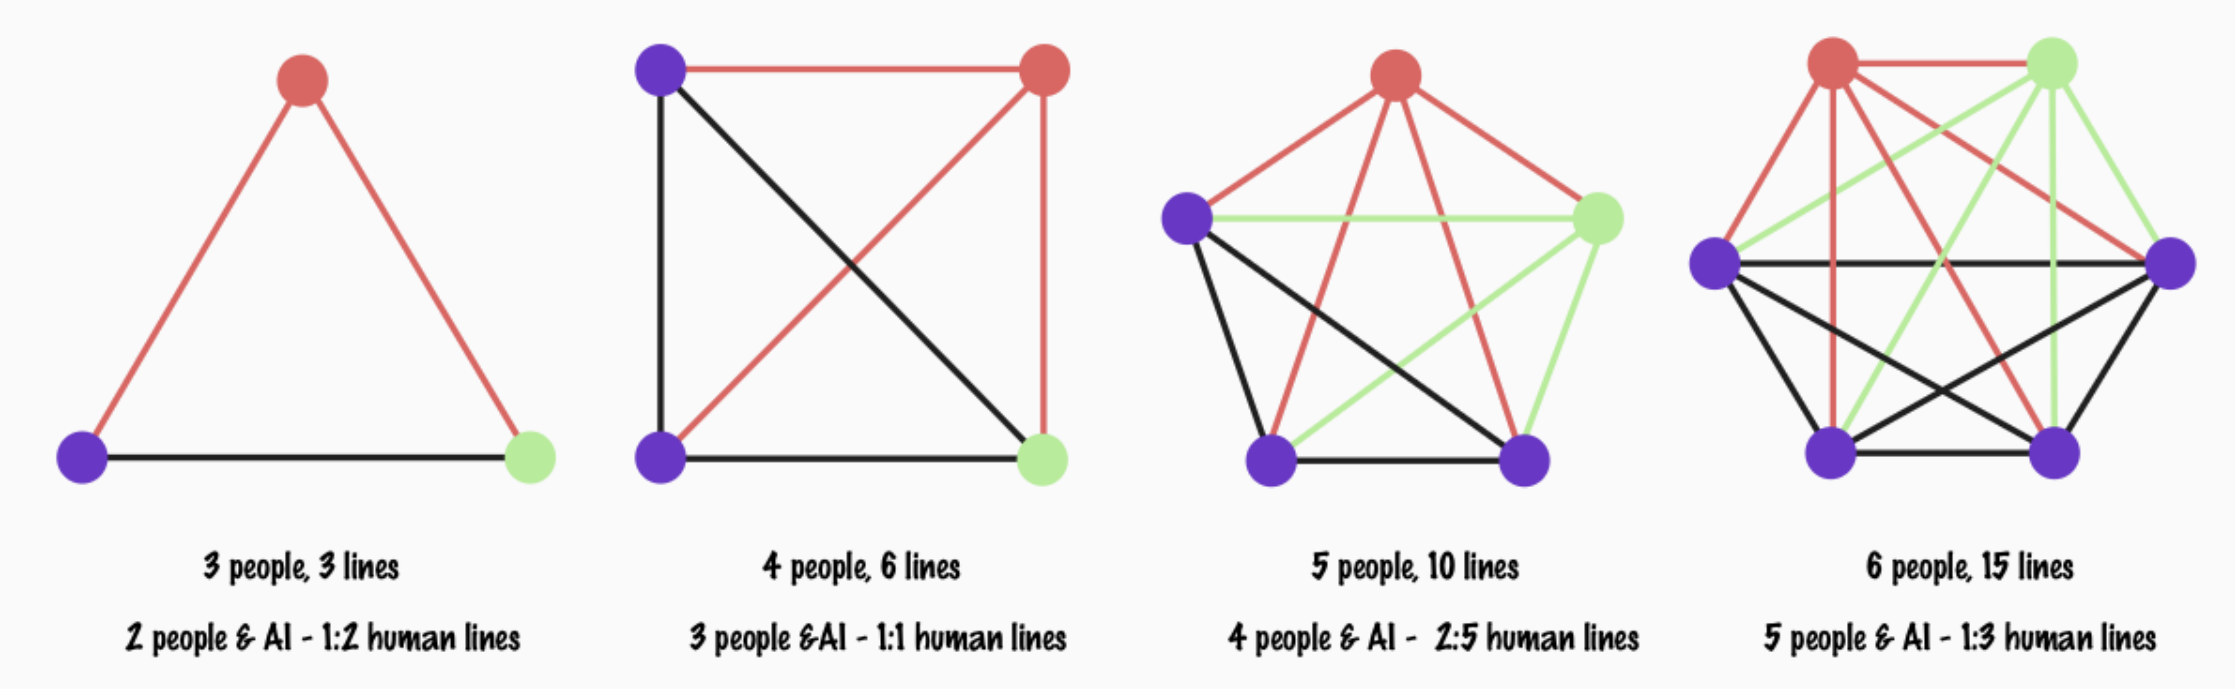

LESSON 3 ON COVERAGE

People coverage matters

© 2026 CGI Inc.

DEEPLY HUMAN COVERAGE

What social at work looks like to you?

© 2026 CGI Inc.

From knowledge workers to builders, specializing in…

Intent Lead

- Defines good.
- Sets the bar.
- Translates outcomes.

Context Engineer

- Curates inputs.
- Maintains freshness.
- Builds assets.

Value Engineer

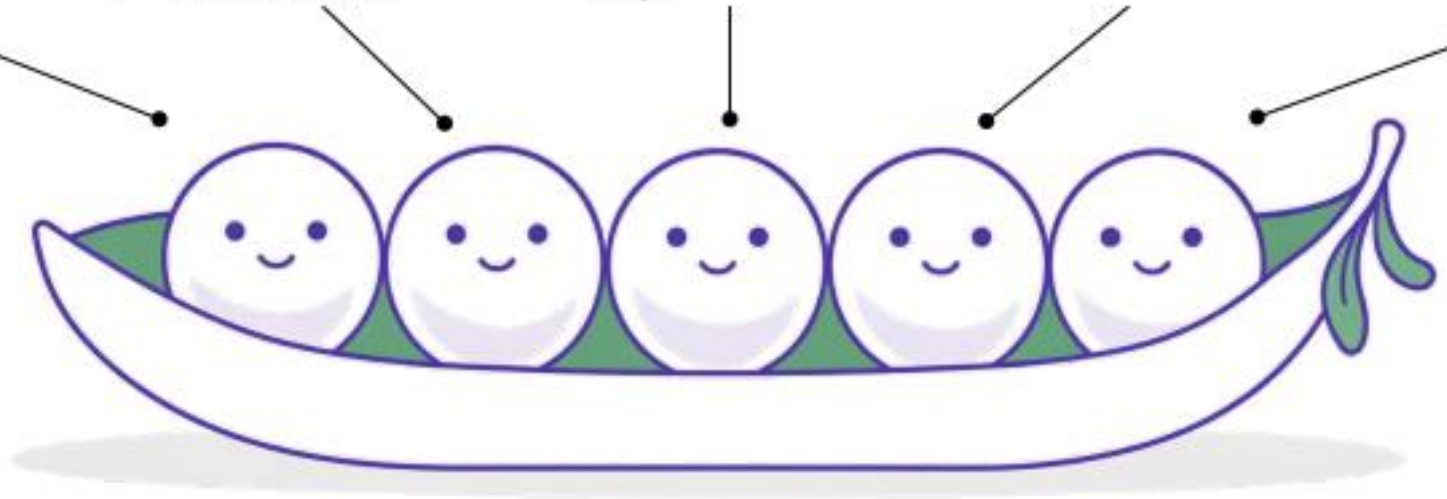

- Directs agents.
- Validates output.
- Decides what to ship.

Alignment Engineer

- Tests behavior.
- Catches drift.
- Bridges gaps.

Experience Engineer

- Designs interaction.
- Anticipates misuse.
- Centers judgment.

© 2026 CGI Inc.

MIX UP THE TRADITIONAL ROLES IS AN OPPORTUNITY TO GROW

Redistribution of work

Traditional ↓ New →	Intent Lead	Context Engineer	Value Engineer	Alignment Engineer	Experience Engineer
Lead	Defines good.		Decides what to ship.		Centers judgment.
Analyst	Sets the bar. Translates outcomes.	Curates inputs. Maintains freshness.		Bridges gaps.	Designs interaction.
Developer		Builds assets.	Directs agents.		
Tester			Validates output.	Tests behavior. Catches drift.	Anticipates misuse.

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-focused to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
